AP Automation

Digitalise and automate your
supplier invoicing process with Ricoh
and its strategic partner Pagero

AP Automation with our partner Pagero

Optimising your accounts payable processes doesn't need to be a difficult or costly experience. While many businesses are aware of the costs associated with manual AP operations, many underestimate the simple actions that can be taken by companies of all sizes to quickly and easily free up working capital.

Ricoh and its strategic partner Pagero provide an AP Automation solution that offers an easy-to-implement and cost-effective way to minimise error handling, ensure data quality and reduce overall AP costs – regardless of your existing systems or AP processes.

Digital

Turn your invoice process
100% digital from day one

Touchless

Automate your invoice
approval process

Accurate

Ensure complete and accurate
data enters your system

Compliant

Fulfil local e-invoice and tax
regulations worldwide

Automate supplier invoice handling

Connect to the Pagero Network with Ricoh to receive all your invoices electronically, straight into your financial system – from day one. Regardless of the systems you use, the size of your business or the digital capabilities of your suppliers, you can go 100% digital with our AP Automation solution.

E-invoicing

Connect to and receive e-invoices from over 4.5M senders.

Supplier Portal

An easy way to connect all your suppliers regardless of their digital capabilities.

Invoice Data Capture

Automate emailed invoice receipt and data capture.

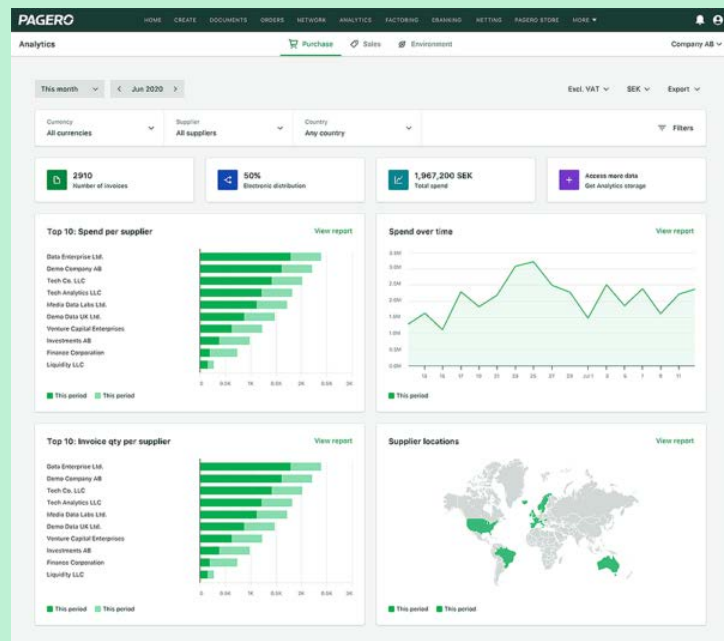

AP Automation add-ons

Pagero Analytics

Turn data into intelligence and unlock the value of line-level access to your invoice data – in real time.

- Real-time spend visibility
- Line-level breakdown
- Report export

Supplier onboarding

Getting your suppliers up to speed is a key factor in an AP Automation project. Successful motivation and onboarding of suppliers have a major influence on the success of your plans.

With our partner Pagero, we offer fully managed supplier onboarding that is tailored to your business strategies and goals.

Having completed over 500 large-scale onboarding projects, Pagero's well-proven methodologies, tools and staff ensure great results.

Additional features

Peppol

Using Pagero, you can receive e-invoices via Peppol – anywhere in the world.

Paper-to-e

Get notified when suppliers become e-ready and start receiving e-invoices instead of paper or PDF.

E-archive

Store invoices for easy searchability while fulfilling all local legal requirements and best practices.

Data Validation

Automatically validate invoice content to ensure accuracy and reduce error handling.

Data Enrichment

Automatically correct and complete invoice data to meet your system requirements.

Adopting efficient processes with the help of Pagero's solutions allows us to demonstrate that we have an effective digital strategy and that we are fully-committed to this area.
